

# Adobe Acrobat® 7.0 Standard

## Transform PDF files into Intelligent Documents

Adobe Acrobat 7.0 Standard software is the simple way to create and share more secure and reliable Adobe PDF documents. Generate Adobe PDF files that accurately represent the original document, and take advantage of robust tools for sharing information and commenting on electronic files.

It is often difficult and time-consuming to combine files from multiple applications and sources into one document, and nearly impossible to maintain the formatting of the document throughout the review process. With Adobe Acrobat 7.0 Standard software, you can combine files from different sources into one organized PDF document. Share the PDF document with reviewers who can read and comment on it but not alter it. Then consolidate and compare comments to create a polished PDF document that includes tailored security features—so you can distribute it confidently.

### **Create and share documents quickly and easily**

Adobe Acrobat 7.0 Standard software enables business, creative, and technical professionals to convert electronic or paper documents into an Adobe PDF file that accurately represents the original document. Adobe PDF documents can be opened by anyone around the world using free Adobe Reader® 7.0 software.

### **Combine different files to create an organized document**

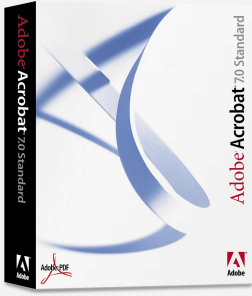

Combine files from different applications into one compressed package that stays a single file even after it is opened. Assemble text files, charts, spreadsheets, drawings, and more. And deliver one professional document that anyone can open using Adobe Reader 7.0.

### **Use familiar tools for review and commenting**

Give reviewers familiar tools such as a highlighter, sticky notes, pen, and more to mark up not only text, but also spreadsheets, diagrams, and charts. Then sort and filter comments from reviewers that appear in a single Adobe PDF file.

### **Protect document content to help preserve its integrity**

Adobe Acrobat 7.0 Standard lets you restrict access to documents using passwords. Digital signatures help ensure that documents have not been fraudulently altered.

## System requirements

### Windows®

- Intel® Pentium® processor
- Microsoft® Windows 2000 with Service Pack 2, Windows XP Professional or Home Edition, or Windows XP Tablet PC Edition
- Microsoft Internet Explorer 5.5

### Create and share documents quickly and easily

- Create PDF documents with one-button ease from Microsoft Word, Excel, and PowerPoint. Windows users can also convert to PDF from Access, Internet Explorer, Outlook, and Publisher.
- Scan paper document archives to create compact, searchable Adobe PDF documents.

### Combine different files to create an organized document

- Create a single Adobe PDF file from multiple sources—including Web pages and e-mail—to deliver one professional document that anyone can open using free Adobe Reader 7.0 software.

- Arrange pages in an Adobe PDF file in the order you want, to present information accurately and effectively.

- Easily add headers, footers, and watermarks.

- Search according to text and document properties to quickly find files on local machines and network drives.

### Use familiar tools for review and commenting

- Use familiar commenting tools including a highlighter, sticky notes, pen, strikethrough, and more.
- Collect comments, not rewrites, from multiple reviewers that appear together in a single Adobe PDF document. Manage comments using sort and filter tools.
- Create a list of reviewers and automatically track the feedback you receive.

### Protect document content to help preserve its integrity

- Control documents inside and outside the firewall, online and offline.
- Restrict access to documents using 128-bit encryption.
- Set document permissions and restrict whether Adobe PDF documents can be printed or changed.
